COVID-19 and WeHaKee Camp for Girls Summer 2022 Addendum

(November 22, 2021)

We had an exceptionally safe and healthy Summer 2021 at WeHaKee – our comprehensive and intentional preparations had paid off as we had no cases of the virus in any of our sessions throughout the summer. As we prepare for Summer 2022, we ask our families to prepare their children to arrive at camp healthy while we work to ensure that they return home safely and virus free. We strongly urge all campers and staff (who are able) to be fully vaccinated prior to arriving at camp.

As we monitor the status of the COVID-19 pandemic we plan to implement those pandemic protocols we developed in 2021 that will be necessary to maintain a healthy and safe camp community in 2022. It is our hope that we will be able to incrementally relax our pandemic protocols as vaccination rates rise and transmission levels drop.

Current COVID-19 Vaccination Policy

WeHaKee Camp for Girls **STRONGLY ENCOURAGES** all of the members of our camp community to be fully vaccinated (including receiving available booster shots for those eligible) prior to arriving at Camp WeHaKee.

Vaccinated Campers, Staff, Volunteers

- Are asked to provide official documentation of vaccination (vaccination card, health provider records, health department records, etc.) prior to arriving at camp.
- Fully vaccinated individuals may need to be tested for COVID-19 if conditions warrant full camp community testing.

Non-Vaccinated Campers, Staff, Volunteers

- **If an individual is unable or unwilling to be fully vaccinated, they need to contact WeHaKee Camp for Girls directly (by email or phone) to discuss their situation further.**
- Non-Vaccinated individuals may be required to be tested for COVID-19 prior to arriving at camp as well as during their time at camp. They may also be required to wear a mask in settings where social distancing is not possible for their protection and the protection of the camp community.

Cleaning, Sanitization, & Handwashing Procedures

We will maintain our enhanced cleaning and sanitization procedures throughout camp. Every dining area table will have a large hand sanitizer dispenser. Bathrooms and shared spaces will be cleaned and sanitized on a regular and thorough basis. Camp buildings and vehicles will be equipped with hand sanitizer dispensers and disinfectant spray bottles to clean shared surfaces. Campers and staff will be frequently reminded and encouraged to wash their hands regularly and thoroughly throughout the day.
